## **Bug 93**

Summary: Partial.with fails with NPE.

## **Description:**

## What steps will reproduce the problem?

Fails with yearOfCentury, year and yearOfEra. Probably because weekyear has a null range duration type.

#### **Code Provided**

new Partial(yearOfCentury(), 1).with(weekyear(), 1); // NullPointerException

// org.joda.time.Partial.with (Partial.java:447)
